EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Anne Marie Yvon on 07/19/04.

The application has been amended as follows:

In the claims:

In claim 14 line 7 after "be rotated" and before "to allow", --with respect to the shaft—has been inserted.

In claim 20 line 7 after "be rotated" and before "to allow", --with respect to the first shaft—has been inserted.

Allowable Subject Matter

Claims 14-25 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art fails to teach a method for administering a biologically active substance that includes the combination of inserting a shaft with a node mounted within a restraining structure at the distal end of the shaft where the node can be rotated with respect to the shaft to allow manipulation of a catheter or tool that can extend from the node at the distal end of the shaft and controlling the location of the distal end of the shaft via control cables within the shaft.

Application/Control Number: 09/943,346

Art Unit: 3763

ì

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art most resembling the present invention is US Pat# 5,454,788. Figure 23 shows an elastomeric sealing element (216) encased in a structure (200) at the distal end of a balloon catheter shaft. However, this device does not provide for rotation of the elastomeric sealing element with respect to the catheter shaft.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Catherine S. Williams whose telephone number is 703-308-4846. The examiner can normally be reached on Monday - Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Casler can be reached on 703-308-3552. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
